

**Figure:**

**Caption:** Example of a graphical representation of a CRS. The CRS consists of five chemicals  $X = \{a, b, c, d, e\}$  and four reactions  $a + b \rightarrow c, c + b \rightarrow d, b + d \rightarrow e$  and  $c + d \rightarrow e$ , which are catalyzed by  $d, a, e$  and  $d$ , respectively. The food set is given by  $F = \{a, b\}$ .
