Figure:

Caption: Example of a graphical representation of a CRS. The CRS consists of five chemicals $X = \{a, b, c, d, e\}$ and four reactions $a + b \rightarrow c, c + c$

 $b \rightarrow d$, $b + d \rightarrow e$ and $c + d \rightarrow e$, which are

catalyzed by d, a, e and d, respectively. The food

set is given by $F = \{a, b\}$.

Figures and captions are from paper arxiv: 1908.04642.
